

# WEATHERMATE® – 38CMC

CENTRAL AIR CONDITIONING

ENERGY-EFFICIENT PERFORMANCE AT 11.0 SEER

# CARRIER'S 38CMC AIR CONDITIONER DELIVERS COOL ECONOMY.

## EFFICIENCY & COMFORT

Carrier's WeatherMate® central air conditioners bring comfort, efficiency and affordability to your home. The 38CMC can improve your indoor weather while operating at up to an economical 12.5 SEER (Seasonal Energy Efficiency Ratio). If you're replacing an older unit, that can mean significant savings on your cooling bill. Depending on the efficiency of the unit you're replacing, the 38CMC will trim your cooling costs. And, you can expect the savings to continue for years with Carrier's respected reliability.

Carrier innovations on the 38CMC include an aerodynamic top designed to improve the unit's stability while enhancing the efficiency and reducing the noise through improved airflow. Protective features built into the unit's most important component, the compressor, ensure lasting performance and reliability. And, for corrosion-resistant good looks, the compact cabinet is coated with our baked-on WeatherArmor™ III finish.

## RELIABLE COOLING

By the time the 38CMC arrives at your home, it has been thoroughly tested and retested. It starts during the early stages of design and doesn't end until the completed product is run-tested at the factory. Throughout production, Carrier products are subjected to the industry's toughest testing standards. We want to be confident that the 38CMC central air conditioner will provide years of dependable indoor weather control. Sure, we go beyond the industry's normal procedures for ensuring quality, but that's why homeowners nationwide turn to Carrier for control of their indoor weather.

## TOP-QUALITY TECHNOLOGY

- 1 Quiet, efficient operation is enhanced with Carrier's Aerodynamic Top. This exclusive design allows air to flow through the unit with less turbulence for improved performance and more consistent indoor weather.
- 2 Long-lasting good looks of Carrier's WeatherArmor™ III cabinet keeps your outdoor unit looking clean and new. It's made of galvanized steel and finished with a baked-on powder coating for corrosion and scratch-resistance.
- 3 Durable performance is strengthened by the corrosion-resistant base pan which is designed for superior drainage of water and small debris.
- 4 Added efficiency and durability of the compressor is the result of smoother, more consistent operation. The compressor is the single most important component in an air conditioning system.

## WARRANTY

As the industry's quality leader, Carrier backs its products in writing. The compressor is covered with a **five-year limited warranty**. The entire unit is protected by a **one-year limited warranty**. Ask your Indoor Weather Expert about extended warranty programs.
